

# Building a profile of palliative care teams, operations and service delivery

## Why Participate

- Join the 1,000+ programs that have contributed data to the Registry
- Track your program's development year-to-year
- Assess your program through comparative reports
- Contribute to comprehensive summary reports
- Promote standardization and improve the quality of palliative care

The Registry provides actionable data that programs can use to secure, expand and retain resources for the delivery of high-quality palliative care. It also supports the establishment of new palliative care programs where none exist.

## FREE and Open to ALL Palliative Care Programs

The National Palliative Care Registry™ is **FREE** and open to all programs in the following settings:

- Hospitals
- Patient's Home
- Office/Clinic
- Long Term Care

The Registry collects annual aggregate data with an online survey. Through a user-friendly and intuitive interface, participants can submit and edit data, and have access to longitudinal and comparison reports at any time.

To view sample reports and submit data, visit [registry.capc.org](https://registry.capc.org).
